SUMMARY

Aspiring Software developer with skills in Java, JavaScript (including React.js), and fundamental web development principles. Proficient in MySQL, with a keen interest in continual learning and growth. Eager to contribute problem-solving abilities and a passion for developing innovative web solutions within a collaborative team environment. Seeking an entry-level role to initiate my career journey, gain hands-on project experience, and cultivate professional growth.

EXPERIENCE

Java Development Intern
CodeClause   February 2024 - March 2024,Pune , Maharashtra

·**Developed and implemented Java** applications utilizing Swing UI for user interaction and a relational database (e.g., MySQL) for data persistence.

·**Developed two Java-based applications:** an online banking system and a distributed file system. Leveraged Java, Swing UI, and SQL for both projects. The banking system facilitated deposit, transfer, and withdrawal functionalities, while the file system ensured secure storage and retrieval of files.

·**Demonstrated strong communication skills** to understand project requirements and provide clear technical explanations.

Machine Learning as Software Trainee
Clifton IT Solutions   January 2024 - March 2024,Pune, Maharashtra

·**Expanded technical skillset:** Mastered time series analysis, 3D model animations, Babylon JS, Web Sockets, and React.js, significantly enhancing my web development capabilities.

·**Contributed to a 3D Chat Application:** Collaborated with a mentor on the development of a 3D model chat application, gaining valuable hands-on experience in the software development lifecycle.

PROJECTS

ApniSabzi - Fresh Produce E-commerce Platform
December 2023 - April 2024
·Developed "ApniSabzi," a fresh produce e-commerce platform using MERN stack, in collaboration, with responsibility division.
·Led UI design and development covering browsing, purchasing, cart management, order placement, and an order summary interface.
·Implemented download invoice feature for enhanced user experience.

Computer Lab Management System
January 2023 - May 2023
·Developed a System to schedule Labs efficiently and to ease the Manual work of the administrator.
·Worked as a partner, designed the database schema, and implemented the core functionality of the system which is the scheduling.
